PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 3+ years of experience designing scalable web applications using PHP (Laravel), MySQL, and RESTful APIs. Experienced in SaaS finance platforms, e-commerce systems, and real-time booking applications. Skilled in API development, authentication systems, database optimization, and deployed Node.js and React.js Projects in (Vercel, Render, MongoDB Atlas). Passionate about building secure, high-performance backend architectures.

TECHNICAL SKILLS

Backend:

PHP (3+ Years), Laravel 8, CodeIgniter 3, Node.js (Express), RESTful APIs, MVC Architecture, OOP, Authentication & Authorization, Stripe Integration, Background Jobs, Events & Listeners, Python

Frontend:

React.js (Deployed Portfolio), JavaScript (ES6+), HTML5, CSS3, jQuery, Ajax, Bootstrap

Database:

MySQL (Schema Design, Indexing, Query Optimization), MongoDB (Atlas)

DevOps & Tools:

Git, GitHub, GitLab, Postman, Docker (Basics), Vercel Deployment, Render Deployment, Linux Basics, DNS Configuration

TECHNICAL HIGHLIGHTS

- Designed RESTful APIs for mobile and web clients
- Implemented Stripe payment integration
- Optimized database queries improving performance by 25–32%
- Built role-based authentication & authorization
- Implemented background jobs using Laravel Events & Listeners
- Designed scalable database schemas

EXPERIENCE

Specialist Engineer

Aparajitha Software Services Pvt Ltd, Madurai | January 2025 – Present

- **Designed and optimized secure backend modules using Laravel & MySQL.**
- **Improved data retrieval performance by 25% through indexing and query restructuring.**
- **Built scalable REST APIs with role-based authentication and validation.**
- **Contributed to enterprise-grade SaaS systems in Agile environment.**

Associate Software Engineer

Azinova Technologies, Technopark, Thiruvananthapuram | October 2023 – November 2024

- Built and enhanced **enterprise-level web systems** using Laravel following **structured development principles**.
- Designed REST APIs for mobile and web clients.
- Integrated secure Stripe payment gateway with transaction validation.
- Performed functional testing and issue resolution to improve **application quality**.

System Engineer

Novelx Technologies, Eraviputhoorkadai | June 2022 - September 2023

- **Developed backend systems using CodeIgniter and MySQL.**
- Worked closely with team members to **ensure smooth cross-functional collaboration** during the development and maintenance phases.
- Implemented **authentication and authorization** workflows.
- Utilized **MVC frameworks** for efficient **code management and development**.

PROJECTS

Buddy Invoice System - SaaS (Enterprise Finance Automation)

- Designed scalable backend modules using Laravel 8.
- Implemented background job processing with Events & Listeners.
- Built secure **file management system with role-based access control**.
- Improved **API response performance by 32%**.

Day Mart – E-Commerce Platform

- Developed REST APIs for mobile app integration.
- Integrated Stripe payment gateway securely.
- Implemented caching mechanisms for performance optimization.

Email Projects - Real-Time Booking Platform

- Developed slot-based booking logic with scalable backend design.
- Implemented authentication & role-based access.
- Optimized database queries for performance.

EDUCATION

- **BCA** (Bachelor of Computer Application), Nesamony Memorial Christian College, Marthandam - **62%** (2016-2019)
- **HSC**, C.S.I.V.V. Higher Secondary School, Irenipuram - **72%** (2015-2016)
- **SSLC**, C.S.I.V.V. Higher Secondary School, Irenipuram - **83%** (2013-2014)

CERTIFICATIONS

- **Python Basics and Advance** in Networkz System
- MS Office and Tally in CCS Marthandam
- Great Learning Online Certificates in **Power Bi**
